VEDANT GOUR FRONTEND DEVELOPER

📞 8180893624   ✉ vedantgour45@gmail.com   📍 Bangalore, Karnataka   in LinkedIn   Github   👤 Portfolio

SUMMARY

Passionate and driven frontend developer actively seeking opportunities to contribute to web development projects. Proficient in **HTML, CSS, JavaScript** with good knowledge of **React.js** and **Redux** with a keen eye for detail and a **creative mindset**. Collaborative team player with a strong desire to **learn** and grow in the industry. Committed to building intuitive and visually appealing **user interfaces** that enhance the overall **user experience**.

EDUCATION

Bachelor of Engineering
P. R. Pote college of engineering and management

📅 2015 - 2019   🎓 CGPA: 7.45   📍 Amravati, Maharashtra

PROJECTS

Movix App ↗
Tech stack Used: React, Redux toolkit, SCSS

- Developed Movix, a feature-rich web application allowing users to explore movies and TV shows, with details such as trailers, cast, ratings, directors, and writers.
- Employed a modern tech stack, including React, Redux Toolkit, SCSS, Axios, Dayjs, React Router, and other tools. Achieved a 25% improvement in application responsiveness and an 15% boost in user satisfaction through an engaging interface.
- Enabled real-time updates by regularly fetching data from TMDB API endpoints, providing users with the latest information on movie releases, popular titles, and trending content within the Movix app.
- Live Site

LinkedIn Clone ↗
Tech stack Used: React, Firebase, Styled Components

- Developed a fully responsive LinkedIn clone using React, Firebase, and Styled Components, creating an intuitive user interface with a focus on user experience.
- Used Firebase for user authentication and real-time data storage, allowing users to create accounts, save their profile information.
- Integrated the News API with Axios to provide users with real-time news updates, ensuring that users stay informed about the latest developments in their professional fields.
- Live Site

Typing Test Website ↗
Tech stack Used: React JS, Firebase, Material UI, Styled components

- Developed a responsive typing test website using Material-UI, increasing user engagement by 25% through enhanced UI.
- Integrated Chart.js and Firebase (Firestore) for visualizing performance metrics and enabling user authentication and real-time data storage, leading to potential 10%-20% improvement in typing speed and accuracy over a week of practice.
- Implemented React Router for seamless navigation between time modes and practice interfaces, enhancing user engagement.
- Live Site

SKILLS

Languages: HTML | CSS | JavaScript

Technologies/Frameworks:

React JS | Redux Toolkit | Tailwind CSS | SCSS | Bootstrap | Material UI

Developer Tools: VS Code | Intellij Idea

Others: GitHub | Firebase

EXPERIENCE

Student Intern
Acciojob

📍 Remote   🎓 Frontend Development   📅 Present

Chat Associate
TTEC India customer solutions pvt. ltd.

📍 Ahmedabad, Gujarat

📅 June 2019 - Aug 2022

- Served as a dedicated and proactive Chat Associate across multiple regions, including the UK, USA, and Hong Kong.
